

PaintLine™ Inverted Conveyors

Clean, Reliable Inverted Conveyors

RICHARDS-WILCOX INVERTED CONVEYOR SYSTEMS

Richards-Wilcox Inverted PaintLine™ Conveyor Systems combine reliable, clean conveyor operation with the vertical flexibility made possible only through the unique design of Richards-Wilcox Inverted Pendants.

Unlike a rigid pendant, the investment cast Inverted Pendant pivots forward and backward on the wheel axle to allow free rotation up to 30° with no torque or wear on the chain assembly. The Inverted Conveyor System is ideal in production environments where clean operation is essential.

PaintLine™ Inverted Conveyors

FEATURES

- **Adjustable/Removable Load Centers.**
Shorter load centers in 6" increments allow for maximum productivity and control.
- **Manufactured/Stocked Modular Components.**
For exceptional precision and fast installation.
- **75 lb. Load Capacity Pendants.**
- **Minimal Headroom Requirements.**
Richards-Wilcox Inverted Conveyors maximize your production space.
- **Removable Pendant.**
For easy maintenance, replacement, or reconfiguration.

TYPICAL INVERTED APPLICATIONS

- Paint and Varnish Applications
- Electronics Manufacturing
- Pin Systems
- Pan Conveyor Assembly
- Kitting Assembly
- Tote Conveyors
- Package Handling

BENEFITS

- **Eliminates Drip Pans and Sanitary Hooks.**
Richards-Wilcox Inverted Conveyor design makes messy drip pans and other "clean" equipment obsolete.
- **Extends Chain and Track Life.**
Pivoting pendant allows for free rotation up and down vertical inclines with no torque or wear on chain assembly.
- **Reduces Maintenance.**
Less friction and wear mean lower maintenance costs and down time.
- **Reduces Operational Costs.**
Pendants last longer because they work better.
- **Increases Production.**
Less down time, less maintenance, cleaner operation, and lower conveyor costs all make your operation more productive.

Richards-Wilcox offers complete engineering and controls design, in-house simulation, project management, and installation services for all of its conveyor systems. See how Richards-Wilcox ingenuity, engineering, and product excellence can design a better material handling solution for your business. For more information, please call 1-800-253-5668.
